

# Lifting point deemed unfit for use?

## We have a solution.

The updated design of the mistake plate, consisting of a swivelling head, allows the plate to be loaded in any direction with no impact on its 5t WLL capacity. The new plate also has integrated multi-holed design in each corner, allowing for the user to drill new holes if reinforcement is hit, without having to reposition the plate.

### MPLATE F&B'S

- 5t WLL
- *NEW* swiveling head allows for loads to be applied in any direction with no reduction in capacity
- Suitable for thicknesses of 150mm and above
- Compliant to AS3850:2015 (+AI 2019) & NZ GPG 2018
- Made in Australia
