

## How to identify a genuine Reid™ Edge Lift Anchor

Reid Clutches, Anchors, and Accessories are specifically designed, manufactured and tested to ensure that they perform together for the purpose of lifting precast or tilt-up concrete elements.

The purpose of this safety alert is to help minimise the likelihood of lifting failure in a precast or tilt-up concrete element where incompatible Reid Clutches and Anchors are used.

How to identify a Reid Edge Lift Anchor?

-  Reid Edge Lift Anchors are **manufactured from Forged Steel, Hot Dipped Galvanised.**
-  Reid **product code** (e.g. 10ELAWF) stamped only on **one side** of the head of the anchor.
-  Reid **logo** located on the **opposite side** of the anchor.

Please contact Reid for assistance with checking compatibility of Reid products.
