

Lifting point deemed unfit for use? We have a solution.

The swivelling head design of the Reid Mistake Plate, allows it to be loaded in any direction with no impact on its 5t WLL capacity.

The integrated multi-holed design – four in each corner – allows the user to drill new holes if reinforcement is hit, without having to reposition the plate.

INTEGRATED
MULTI-HOLED
DESIGN

NEW 360°
SWIVELING
HEAD

MPLATE F&B'S

- 5t WLL
- Swiveling head allows for loads to be applied in any direction **WITHOUT** reduction in capacity
- Suitable for thicknesses of 150mm and above
- Compliant to AS 3850.1:2024 & NZ GPG 2018
- NATA Proof Load Certificate
- Lifting Eye has multiple axes of movement which can swivel and rotate to safely manoeuvre during lifting of concrete elements.
- Multiple bolt holes allow greater range for Ramset™ SpaTec Xtrem™ or Reid™ BraceSet™ Anchor location fixing
- Made in Australia

Please always refer to the detailed Installation Instructions and follow Safe Lifting Procedures as outlined in the respective Compliance Documentation.
