

NEW 7t Slim Edge Lifting System

No 1 Choice for Builders

More compact
than ever before.

Stronger Lifting, Smarter Construction.

Cost-Effective Lifting

Full capacity without additional hanger bar minimises additional reinforcement needs. System design reduces panel damage and lost time for rework.

Optimised for Dense Reinforcement

Narrow design eliminates installation conflicts in congested panels.

Faster Panel Turnaround

Early strength lifting for quick installation, reducing downtime.

System Compliance

3Dx™ 7t Slim Edge Lift Anchors comply with NZ GPG (2018)

Anchorshield™ Coating

Exclusive to Reid™. Prevents delamination from galvanic reactions, enables visual QA checks, and extends design life.

NEW 7t Slim Edge Lifting System

No 1 Choice for Crane Operators

More compact
than ever before.

Reliable Handling for Safer Lifting.

Smooth Clutch Engagement and Release

The anchor, clutch, and void work together to ensure easy fitment and seamless remote clutch release.

Assured Concrete Anchorage

Class leading performance and stated WLL regardless of whether a perimeter bar is embedded in the panel.

Inter-compatible systems

Three types of 7t anchors, two types of universal Lifting Clutches – Reid 7t Edge Lifting Systems are perfectly interchangeable. Reducing costs, maintenance, and recertification.

System Compliance

3Dx™ 7t Slim Edge Lift Anchors comply with NZ GPG (2018)

Anchorshield™ Coating

Exclusive to Reid™. Prevents delamination from galvanic reactions, enables visual QA checks, and extends design life.

NEW 7t Slim Edge Lifting System

No 1 Choice for Engineers

3DX™

More compact
than ever before.

Precision Engineering for Optimised Lifting.

Superior Load Performance

Designed for high tension and shear loads, improving anchor reliability. Not reliant on perimeter bars.

Optimised for Dense Reinforcement

Compact form factor allows easy placement in tight grids.

Performance Data You Can Trust

Published performance data developed and certified by Reid Chartered Engineers.

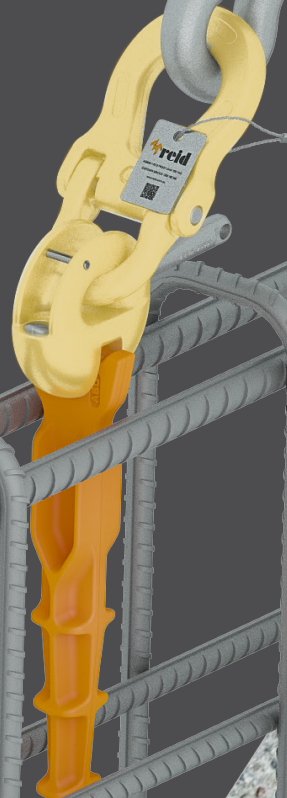

System Compliance

3Dx™ 7t Slim Edge Lift Anchors comply with NZ GPG (2018)

Anchorshield™ Coating

Exclusive to Reid™. Prevents delamination from galvanic reactions, enables visual QA checks, and extends design life.

reids.co.nz | 0800 88 22 12

NEW 7t Slim Edge Lifting System

No 1 Choice for Pre-Casters

More compact
than ever before.

Lifting Made Easier for Precast Production.

Optimised for Dense Reinforcement

Single-leg design eliminates installation conflicts in heavily congested panels.

Faster Installation

Same pre-formed void as double-leg 3Dx™ and 7t SwiftLift™ Systems. Patented to fit snugly to eliminate slurry ingress.

System Integration

Designed to work effortlessly with both Reid™ 7t Edge Lifting clutches, i.e. 3DX7NLC 3Dx™ Articulated as well as 7ELALE SwiftLift™ for precision handling.

System Compliance

3Dx™ 7t Slim Edge Lift Anchors comply with NZ GPG (2018)

Anchorshield™ Coating

Exclusive to Reid™. Prevents delamination from galvanic reactions, enables visual QA checks, and extends design life.
